

RUBICAB ECW FENCING

Unique DIY Fencing Solutions Built from ECW - ECO Composite-Wood

We supply and build fences using long life and maintenance free materials that are highly resilient to Australia's harsh environmental conditions.

The Never Rotting ECW Fencing

We use ECW fencing materials that are composite based and contain 55% wood and 35% HDPE recycled plastic. Once installed, you will have piece of mind and not have to worry about many issues that arise with traditional fences. You never need to paint or worry about structure rotting and falling apart; fixings rusting away, timber drying out and fading.

The Benefits of Using ECW to Build Fences

Our fences are extremely quick and easy to assemble. First, install the composite posts with 4 trenches on each side that allows the slats to slide in. You do not need to screw these, just lay one in after the other.

Posts can be either placed in concrete or we use a steel fence post mount, which can be directly mounted to concrete. Then you simply bolt these down with screw bolts and slide the posts in. Lastly, place the post caps on and you are done.

Our Fencing Range

1 RUBICAB Zebra Premium ECW Fencing

Our most popular. This robust fence uses woodgrain composite boards with opal acrylic inserts for an eye-catching contrast. In the evening, your fence will glow as the sun's natural light passes through.

2 RUBICAB Full Privacy

Full privacy is based on the same system as the without the opal acrylic strips.

Full Privacy in Charcoal Black and Coffee Brown

3 RUBICAB Slim Privacy

Slim Privacy offers a less expensive option. Instead of using 30mm hollow boards, we use a 12mm solid composite with click in system that also works very well as privacy screening.

Height	Post Spacing	Slat Size	Post
1100-2200mm	1521 Centres	1450x145x30	100x100

Height	Post Spacing	Slat Size	Post
1100-2200mm	1502 Centres	1450x150x12	82x82

4 RUBICAB Slat Fencing

For those would like a more open fence. 20mm spacing is provided between each slat to allow air to flow unimpeded.

Height	Post Spacing	Slat Size	Post
1100-2200mm	1502 Centres	1450x82x12	82x82

The Perfect DIY Solution

We are not just a supplier; we deliver our best practices to our customers to ensure our customers can build a project knowing exactly what they need to do and how to go about it.

We can assist through free drafting services (e.g: post spacings, material lists) and site visits to get the most out of your area and materials. We also provide highly accurate quotations and a cut to size service to ensure you are not paying for more than you need.

Email us your photos, location and a plan so we can get started straight away:

composite-wood.com.au/contact-us

Have left over materials after completing your project? No worries! Just bring them back to us and we will provide you a 100% refund on the materials you didn't use, providing they are full and undamaged units.

Colour Range

We have a range of 6 colours to choose from. The most popular colours are Charcoal and Coffee brown. Other colours can be made to order.

Driveway & Pedestrian Gates

We supply and build a variety of manual / automated swing and sliding gates using ECW materials with aluminium powder coated frame for an attractive, lightweight and strong solution.

Double swing gate, automated with Centsys D5 Evo

Pedestrian Slim Privacy gate (right)

Solar Lighting, Customised Numbers & Mailboxes

We offer a range of extras for that nice finishing touch

Custom Fences

There is no fence we cannot supply or build using ECW materials and aluminium. We offer customised solutions no matter what your requirements are or how complex your project is.

One of our customers had existing posts that were in good condition, so their builder utilised them, creating a fence with no visible posts using our ECW-HF-06 Decking Boards, ABS clips and stainless steel screws.

Send us through some photos, location and a plan via our contact us page on your mobile or computer and we can draft an accurate quotation within 2 days.

Delivery & Pickup

We offer Australia-wide distribution using TOLL at very competitive prices. We can deliver to your door or 'care of' a commercial or industrial company with a forklift near you.

We also offer same day local deliveries throughout South-East Queensland and Northern NSW. You are also welcome to come and pick up at the RUBICAB Factory, Burleigh Heads.

Warranty

We offer a simple to understand 10-year guarantee on all ECW products fit for residential purpose and 7 year warranty for commercial applications. Providing a contractor or builder installs it. Or, if you are a DIYer, built using our guidelines.

Our warranty mostly covers structural defects. We will replace your ECW material if installed and used under typical conditions. We will replace the defective product if it cracks, splinters, bows or suffers an infestation of woodborers or termites.
